Document Intelligence

The Finch-AI platform that reads, understands and structures your business documents. Zero manual entry, industrial-grade accuracy.

01 — THE PROBLEM

The hidden cost of manual data entry.

12 min

Per document

Manual keying of invoices, delivery notes, receipts and contracts.

3-5%

Error rate

Typos that drive inventory mismatches and late shipments.

40%

Back-office time

Share of operations effort spent on plain data transcription.

€18k+

Annual cost

Direct and indirect cost for a volume of 500 documents a month.

02 — THE SOLUTION

One engine that reads, understands and delivers data to your systems.

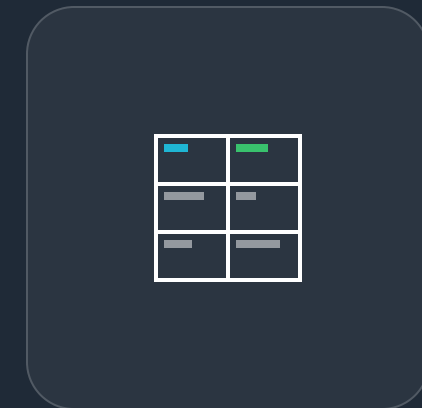

Document

PDF · Photo · Email

Finch-AI

Read & understand

Structured data

JSON · CSV · API

BEYOND OCR

Finch-AI doesn't just read text: it identifies fields, tables and the meaning of every value.

READY TO USE

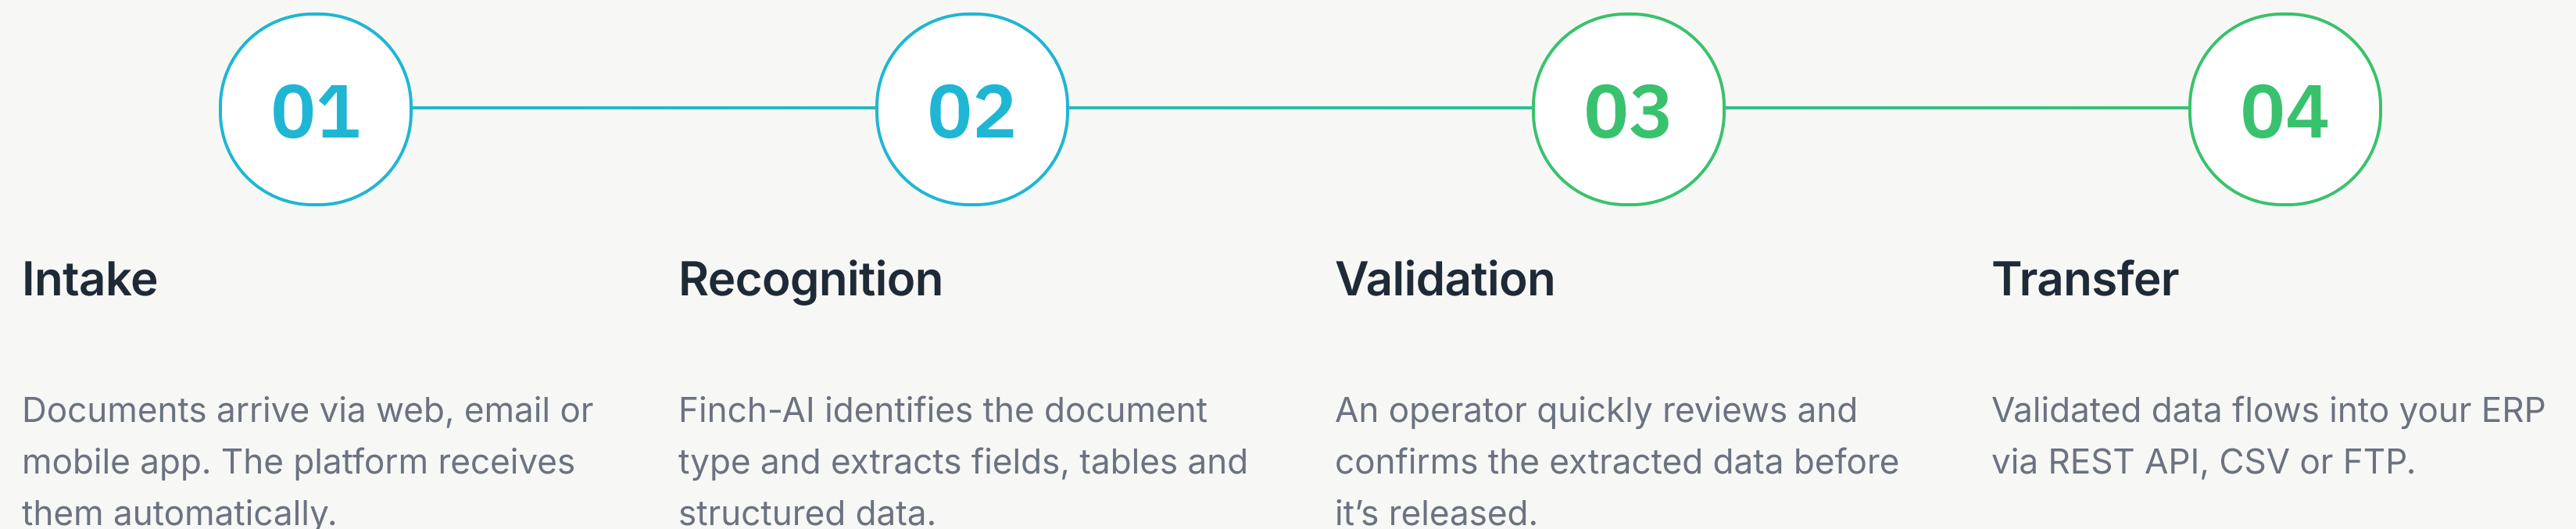

Prebuilt models for the most common document types. No technical setup required.

SAFE & TRACEABLE

Every document follows a validation workflow with full change history.

03 — HOW IT WORKS

From document to your ERP in four steps.

≈ 8 sec Average processing time per page with Finch-AI, compared to 10-15 minutes of manual handling.

04 — SUPPORTED DOCUMENTS

Every document you receive, already supported.

Native, ready-to-use models for the most common finance, logistics, HR and identity documents.

01

Finance

- Invoices
- Receipts
- Bank statements
- Tax documents

02

Logistics

- Delivery notes (DDT)
- Purchase orders
- Contracts

03

Health

- Medical reports
- Prescriptions
- Patient records
- Insurance claims

04

Identity

- ID cards
- Passports
- Driving licences
- Health cards

+ Custom
models

On request, Finch-AI builds dedicated models for client-specific documents — proprietary layouts, internal forms, complex contracts.

A template, ready in five minutes.

A template defines which fields to extract for a given document type. You create one from the web UI in minutes: upload a sample, confirm the detected fields, publish. No technical configuration.

WHAT A TEMPLATE IS

A reusable schema that maps a document type to its fields (vendor, amount, line items, codes). Once defined, every document of that type is extracted automatically with the same structure.

TEMPLATE

• ACTIVE

Supplier invoice

VENDOR

Company name

TEXT

INVOICE_DATE

Invoice date

DATE

TOTAL_AMOUNT

Total amount

AMOUNT

LINE_ITEMS

Item rows

TABLE

•

Every invoice from the same supplier is recognised and extracted automatically.

06 — INTAKE CHANNELS

Three ways documents reach the platform.

01 · WEB

Direct browser upload

Drop one or many files into the web UI. Supports PDF, images and scanned documents.

PDF · JPG · PNG · TIFF

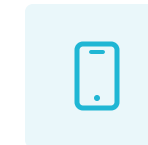

02 · EMAIL

The platform works in the background

Configure a dedicated address: every inbound email with attachments is processed automatically. You do nothing.

Email polling · auto-routing

03 · MOBILE

Android and iOS apps in the field

Snap a photo of the document and start processing instantly. Ideal for warehouse, transport, field operators.

iOS · Android · offline sync

07 — USE CASE

Warehouse inbound goods, mobile-first.

The operator meets the courier with the delivery note in hand. With the Finch-AI app, they photograph the document before they even unload the pallets.

- 1 **Snap the delivery note**
Right on the dock, even in poor light. Edge detection is automatic.
- 2 **Data arrives in seconds**
Sender, packages, codes and quantities are extracted and routed to the ERP.
- 3 **Unload with data aligned**
The warehouse team unloads against a document already recorded in the system. No rework, no queues.

08 — FIELDS & RULES

Tailor extraction with your own words.

A • CUSTOM FIELDS

Define exactly the data you need.

Add custom fields to any template. Finch-AI learns to spot them on your documents.

customer_code	TEXT
cost_center	TEXT
due_date	DATE
net_amount	AMOUNT

B • NATURAL-LANGUAGE RULES

Write the rule as you'd tell a colleague.

No formulas, no scripts. Describe in plain English what the system should do and Finch-AI applies it to every document.

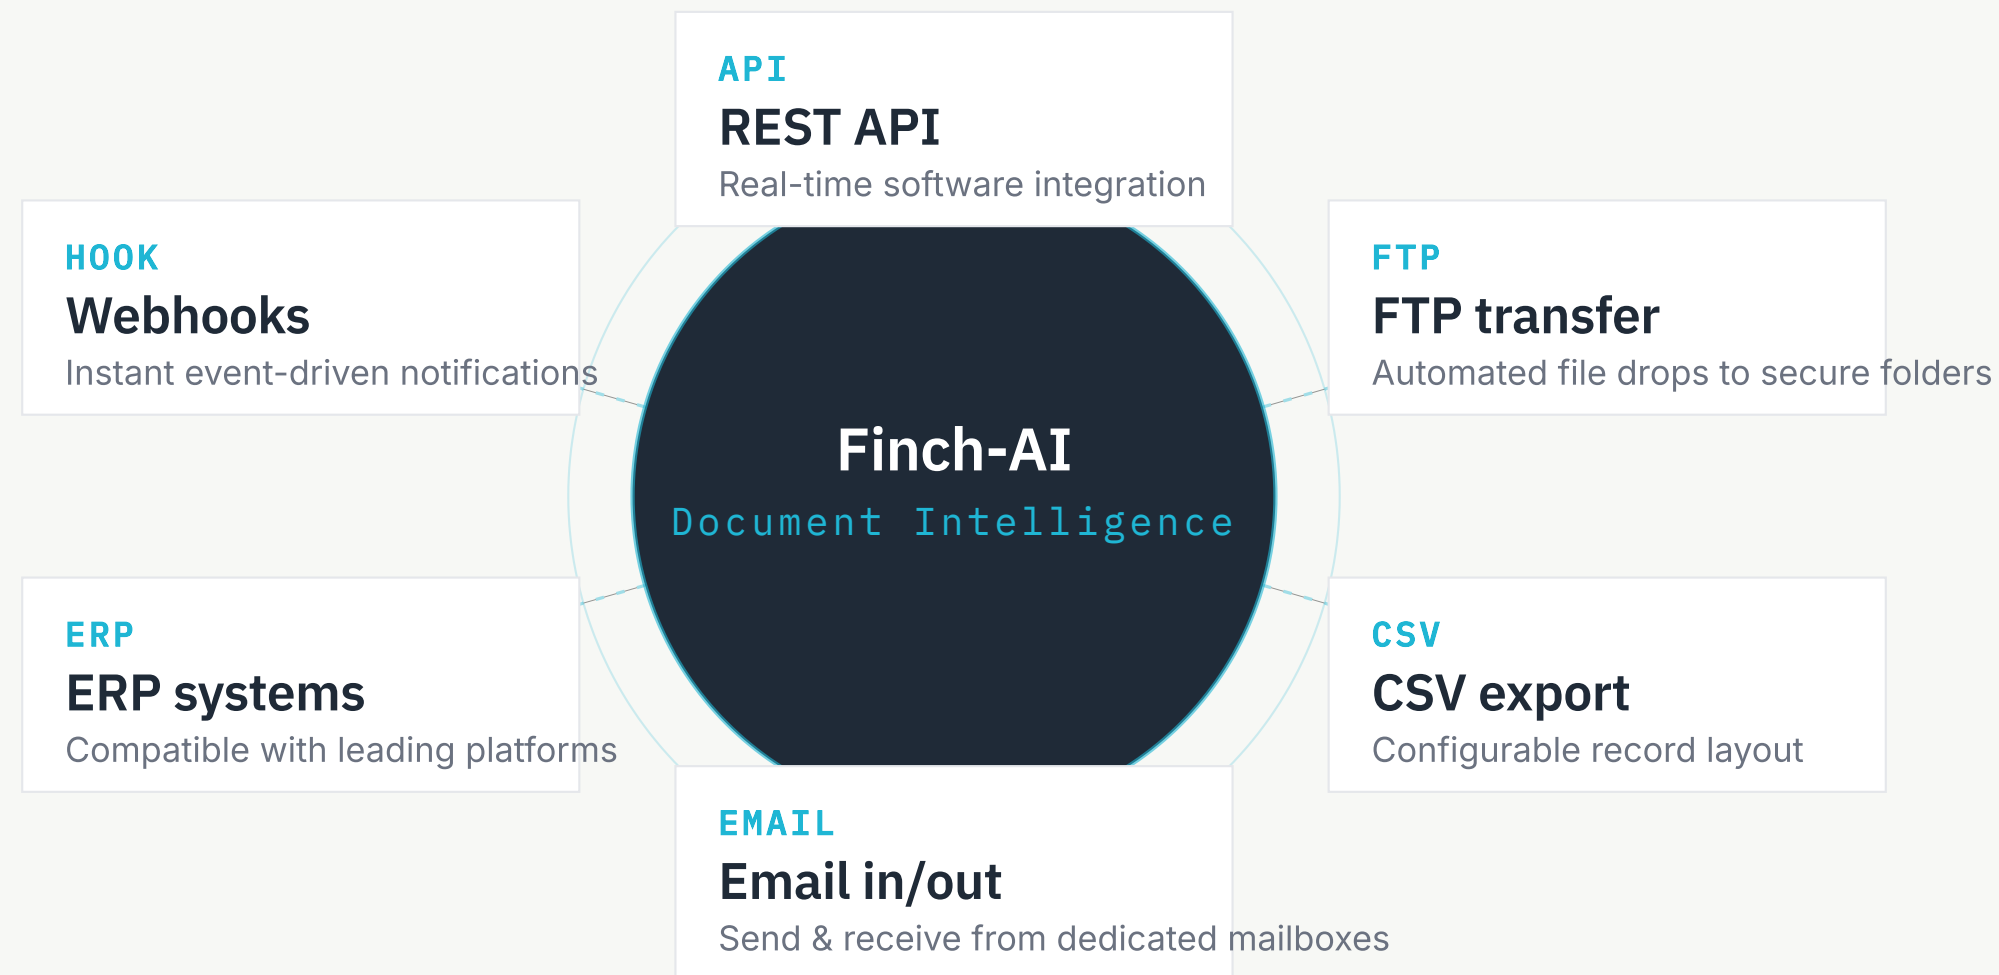

• YOUR RULE

"If the total is above €1,000 and the vendor is Italian, apply 22% VAT; otherwise use the VAT rate stated on the invoice."

RESULT VAT = 22% · € 1,250.00

09 — INTEGRATION

Connects straight into your business systems.

A plan for every volume.

Monthly pricing · VAT excluded

DEMO Demo Free To test the value PAGES / MO 20 DOC TYPES 1 USERS 2 EMAIL POLLING — API — FTP — CUSTOM MODELS — + € 0.20 / extra page	BASIC Basic € 49 /mo PAGES / MO 200 DOC TYPES 2 USERS 5 EMAIL POLLING — API — FTP — CUSTOM MODELS — + € 0.20 / extra page	BUSINESS Business € 129 /mo PAGES / MO 800 DOC TYPES 5 USERS 10 EMAIL POLLING ✓ API — FTP — CUSTOM MODELS — + € 0.17 / extra page	★ MOST POPULAR PROFESSIONAL Professional € 249 /mo PAGES / MO 2,000 DOC TYPES 10 USERS 20 EMAIL POLLING ✓ API — FTP ✓ CUSTOM MODELS — + € 0.14 / extra page	ENTERPRISE Enterprise Custom Fair use · contact us PAGES / MO Fair use DOC TYPES Unlimited USERS Unlimited EMAIL POLLING ✓ API ✓ FTP ✓ CUSTOM MODELS ✓ Contact us for a tailored offer
--	---	---	--	--

⚠ Extra pages cost more than the next plan up. For high volumes, we recommend upgrading.

🕒 Limits are monthly and reset automatically.

11 — RETURN ON INVESTMENT

Tangible, immediate results.

–90%

Time per document

From manual keying to quick verification of pre-extracted data.

97%

Average accuracy

Declared confidence on key fields of standard models.

5 min

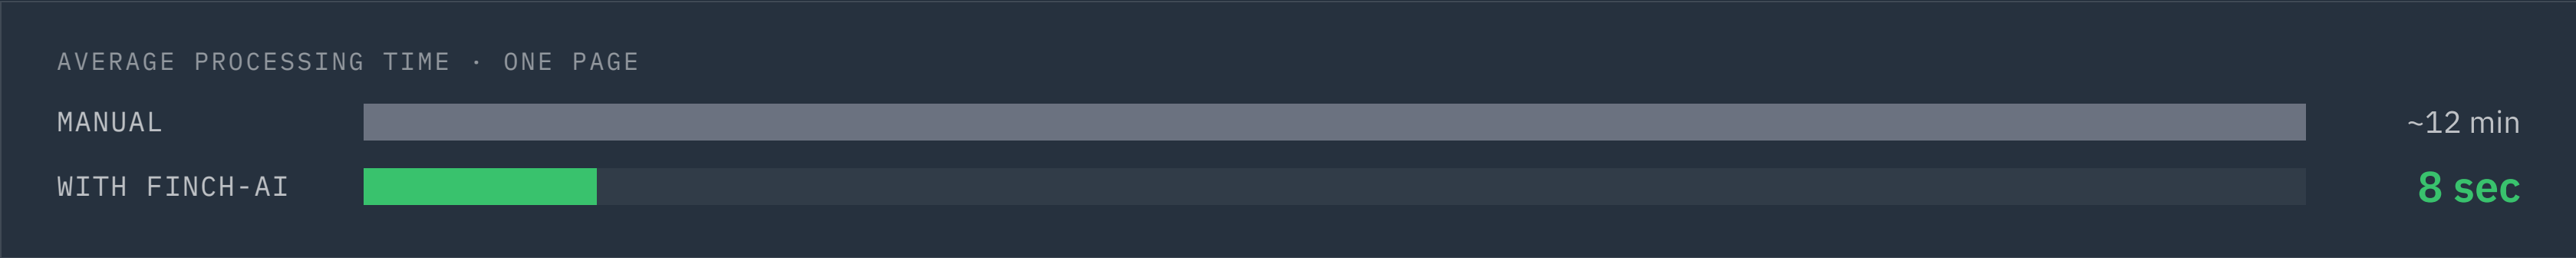

To author a template

Immediate setup, even for non-technical users.

0

Transcription errors

No data reaches your systems without explicit validation.
